Full 2 Way RS232 Port

Control Audio-Video Equipment, HVAC, Lighting, Security Devices Using IR, RS232, IP Protocols

Unlimited device licenses. Use any web enabled device, web tablets, iPads, iPhones or PC, Mac computers, laptops to control your audio-video and home automation system locally or from anywhere in the world. Design as many common or individual menu's so each device is unique and has only specific buttons and features it needs, all from a realtime single skin editing design platform. Easy to use design tools and system device implementation and the Wi-Fi router setup is simple. Add additional hardware to expand the system when needed without license retrictions.

The xLobby 95-IPADCS-1 control system includes 1 xLobby hardware controller, 1 x IR interface module, 1 x RS232 port, 1 x IR interface cable, 1 x wireless router access point.
